

The Village of Stirling formed a municipally controlled corporation called Ridge Utilities Ltd. This energy marketing company will allow residents from across our region to purchase their electricity and natural gas from a locally owned source where profits from the operation are reinvested directly back into our communities rather than simply sent away to a faceless mega corporation in another major city or even another country.

Ridge Utilities has made a conscious choice to offer more competitive monthly administration charges and lower commodity charges to help people save money.

If you are not currently locked into a contract for your natural gas or electricity needs – simply visit the www.ridgeutilities.net website and

click on the program you want to explore. (Please note that we cannot sell to customers of a gas co-op or a rural electrification area.)

Note that while we do offer internet services on the website for both cable and DSL customers, services are not yet available to wireless customers like those who use Explorenet or CCI Wireless.

There are also options if you have solar panels and want to maximize your micro gen credits or if want to procure energy from sustainable sources.

Electricity

Find the right rate for you! Choose from a variety of competitive electricity rates and start saving.

Natural Gas

Just add gas! Simplify your utilities by purchasing all of your energy from one provider.

Green Energy

Simply green what you can afford, the percentage you choose is totally in your hands.
