PART FOUR
STANDARDS OF
DEVELOPMENT

For 1st Reading

PART FOUR: GENERAL STANDARDS OF DEVELOPMENT

Except for more specific, alternative, or additional standards as may be set forth within an individual land use district, the following standards apply to all uses in all land use districts.

SECTION 1 QUALITY OF DEVELOPMENT

- 1.1 The Development Authority may require additional standards as a condition of a development permit, in order to complement existing historical assets or improve the quality of any proposed development such as, but not limited to, paved parking areas, exterior finishes to buildings, site lighting, landscaping or screening, building mass, and street or lot setbacks.

SECTION 2 INFILL DEVELOPMENT

- 2.1 The Development Authority may require an infill development plan illustrating the future road network, utility plan, lot configurations, and other requirements as determined by the Development Authority prior to approving development within any block which has been determined by the Development Authority to have redevelopment potential in accordance with the Municipal Development Plan.

SECTION 3 CORNER LOT SIGHT TRIANGLE

- 3.1 No fence, wall, hedge, landscaping, sign or other material or structure that will obstruct vision between a height of 0.9 metres (3 ft) and 3.0 metres (10 ft) shall be erected, placed, or maintained within the triangular area formed by a line starting at the point of intersection of property lines and extending 9.1 metres (30 ft) from their point of intersection, as shown on the following illustration.

- 3.2 The Development Authority may impose conditions on a development to ensure that adequate visibility and safety of both pedestrians and vehicles is maintained for vehicles entering and exiting rear lanes.

SECTION 4 YARDS

4.1 Corner Lots – Multiple Front Yard Provision

Front and side yards are as illustrated in the diagram below. There are no rear yards on corner lots. Where a lot has more than one front yard, the Development Authority shall determine the front yard requirements, subject to the following limitations:

4.3 **Interior Lots**

Front, side and rear yards are as required in “Minimum Setback Requirements” of the districts in Part 2.

4.4 **Porches and Decks**

Any enclosed porch or deck shall be considered part of the building in the determination of the lot coverage and setback requirements.

4.5 **Attached Garage or Carport**

The side yard requirements for a principal building with an attached garage or carport shall be the same as for a principal building itself.

4.6 **Projections Over Yards**

The portions of, and attachments to a principal building that may, subject to the relevant provisions of Safety Codes, project over or on a yard are:

 - (b) that the design, character and appearance of the building is consistent with the intent of the land use district in which the building is located; and
 - (c) that the development complies with any provisions of a statutory plan applicable to the design, character and appearance of the building in the land use district in which the building is located.
- 5.2 The Development Authority may require that specific finishing materials and colour tones be utilized:
 - (a) to maintain the compatibility of any proposed development with surrounding or adjacent developments;
 - (b) to maintain the compatibility of any proposed additions or ancillary structures with existing buildings on the same lot.
- 5.3 The maximum allowable height above the average finished surface level of the surrounding ground of the exposed portion of a building foundation may be regulated by the Development Authority.
- 5.4 On a lot with more than one street frontage or on a lot with potential for further subdivision, the Development Authority may regulate the orientation of buildings.

- 5.6 The Development Authority may require varied building setbacks if the variation in setbacks will enhance the appearance of that area.

SECTION 6 GRADING AND DRAINAGE

- 6.1 The Development Authority may require:
- (a) grading and other measures including the construction of retaining walls, as appropriate to control surface drainage, reduce or eliminate grade differences between adjacent lots, and minimize erosion or slope instability;

- 7.7 Where any parcel or part of a parcel is used for outdoor storage of goods, machinery, vehicles, buildings or waste materials, the Development Authority may require satisfactory screening by buildings, fences, hedges, trees, berming or other landscaping features.
- 7.8 Screening and/or buffering between a non-residential use and residential use may be required at the discretion of the Development Authority.
- 7.9 The Development Authority may impose additional landscaping or screening requirements on a development approval for a permitted or discretionary use if these would serve to improve the quality or compatibility of the proposed development.

SECTION 8 ROAD ACCESS

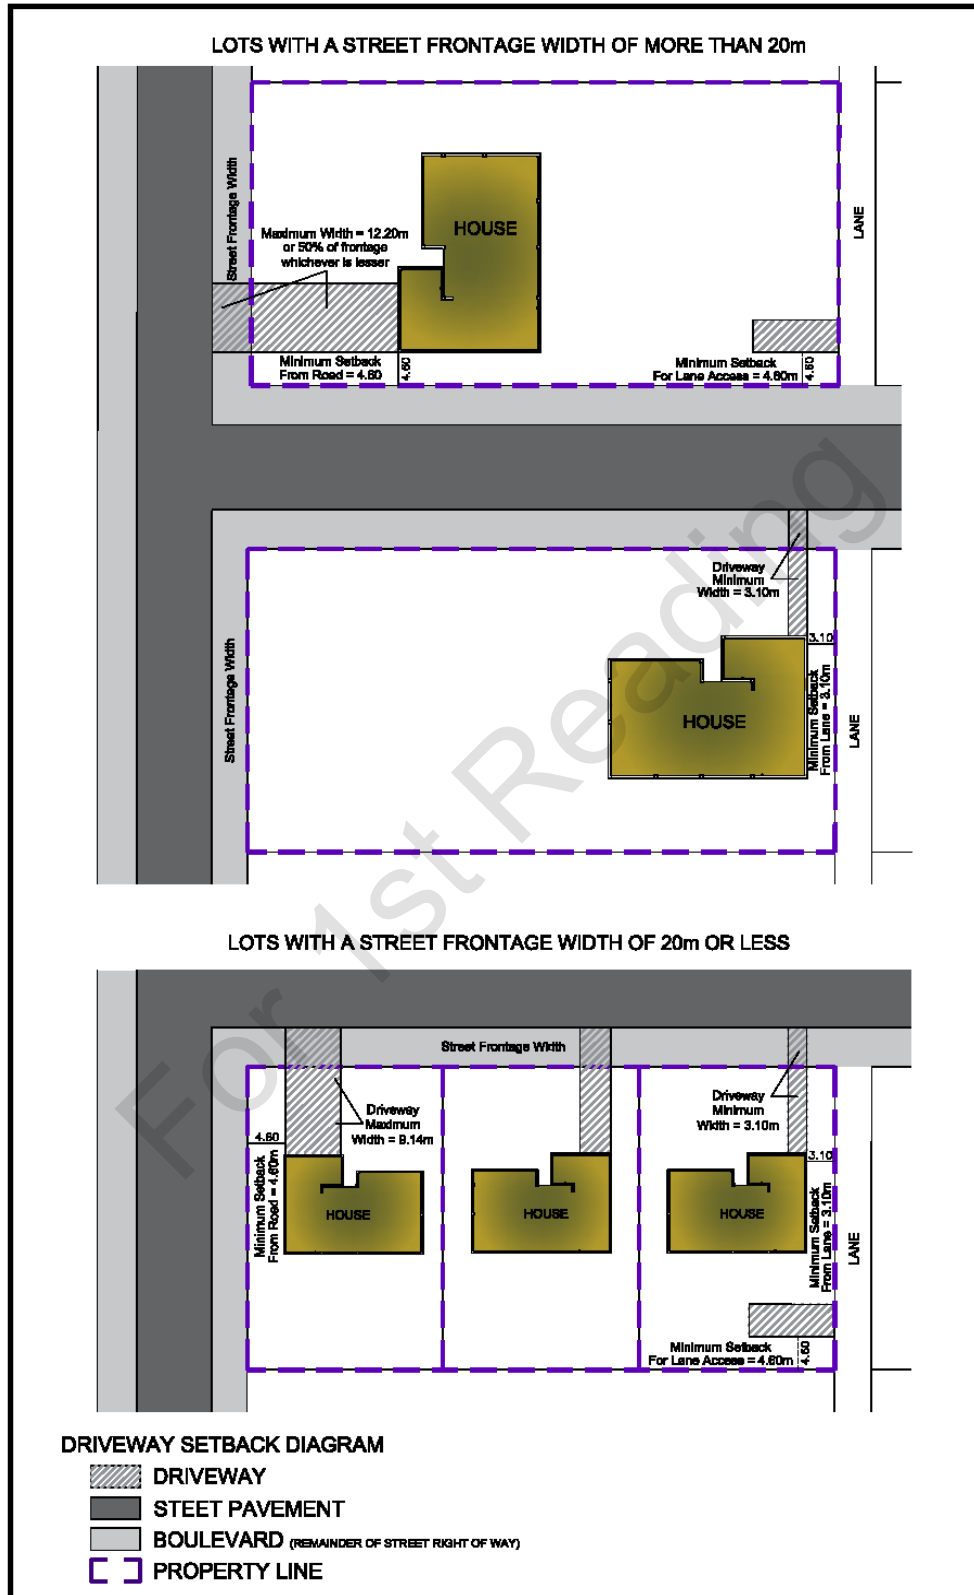

- 8.1 All new development must have access to a municipal road that is satisfactory to the Development Authority. A development agreement to address the costs of upgrading or constructing municipal roads may be required at the time of subdivision and development.
