#### **About Stirling:**

The Village of Stirling is one of three communities in Canada designated as a National Historic Site and is the largest village in Alberta by population with 1,269 residents as of the 2019 municipal census. While Stirling is proud of its past, the community is also preparing for the future with high-speed fibre optic broadband internet service connected to more than 90% of households as well as solar arrays on public buildings to offset municipal power consumption needs resulting in Canada's first electrically "net zero" Village.
